20121129@Yichang

Outline

- AST 3 system
- 2012 Operation
- Operation and Control systems
 - Computers, disk arrays
 - Survey softwares

AST3 System

Antartic Survey Telescope x 3 (AST3)

- Three 50/68cm modified Schmidt Telescopes (NIAOT);
 - spherical corrector
 - short tube
 - aberration correction
 - atmosphere dispersion corrector (ADC)
- Filters: g, r, i, IR(?),

AST3 CCD Camera

- CCD camera (STA1600-FT)
 - 10k x 10k (**largest single CCD chip**)
 - 9 micron/pixel
- Plate Scale: 1"/pixel

AST3 CCD Camera

- No shutter, to avoid mechanical failure
- To be operated in Frame Transfer mode, 10k x 5k
- FOV: ~ 4.3 sq. degree
- 16 readout channels for fast readout

AST3 CCD Camera

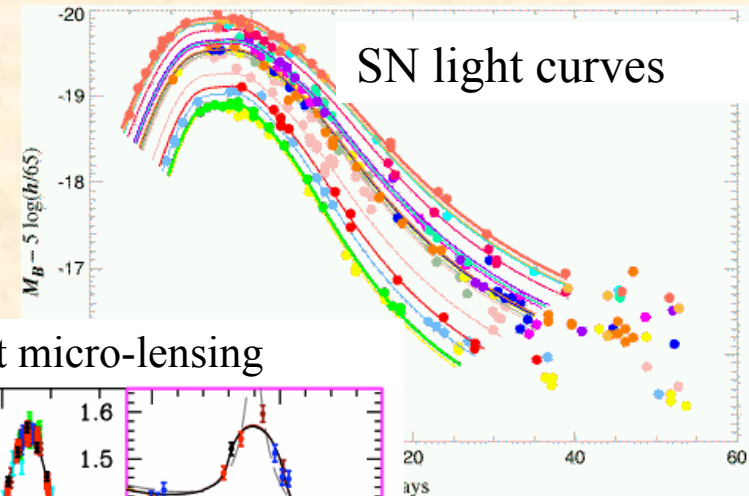

- No shutter, to avoid mechanical failure
- To be operated in Frame Transfer mode, 10k x 5k
- FOV: ~ 4.3 sq. degree
- 16 readout channels for fast readout

- Overscan: 180 columns/channel, 20 lines

AST3 Sciences--- Time domain astronomy

- **Supernova**
 - Very early discovery
 - Uniform, multi-color light-curve
- **Ex-solar planets**
 - Transients
 - Micro-lensing
- **Variable stars**
- **Quasar, AGN**
- **Gamma-ray bursts**
- **LMC, SMC**
 - Nova
 - Micro-lensing
- ...

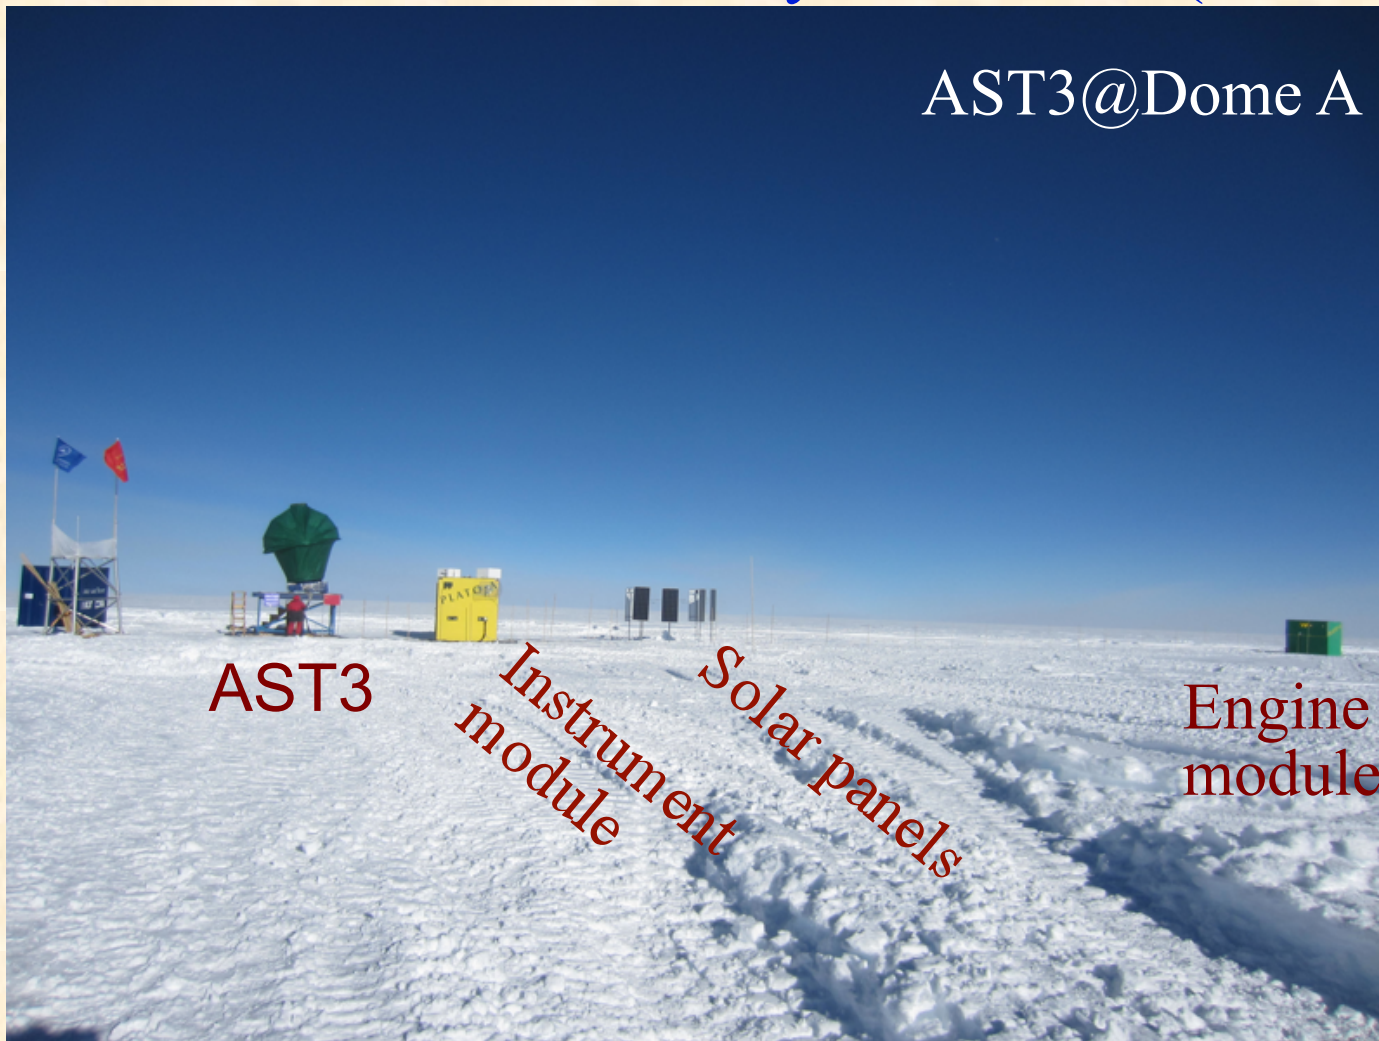

- High quality data
- Accurate photometry
- Real-time

2012 Operation

AST3-1

- Installed the 1st telescope at Dome A in January 2012
- Power and communication by PLATO-A (UNSW)

AST3 Control, Operation and Data System (CODS) —Hardware + Software

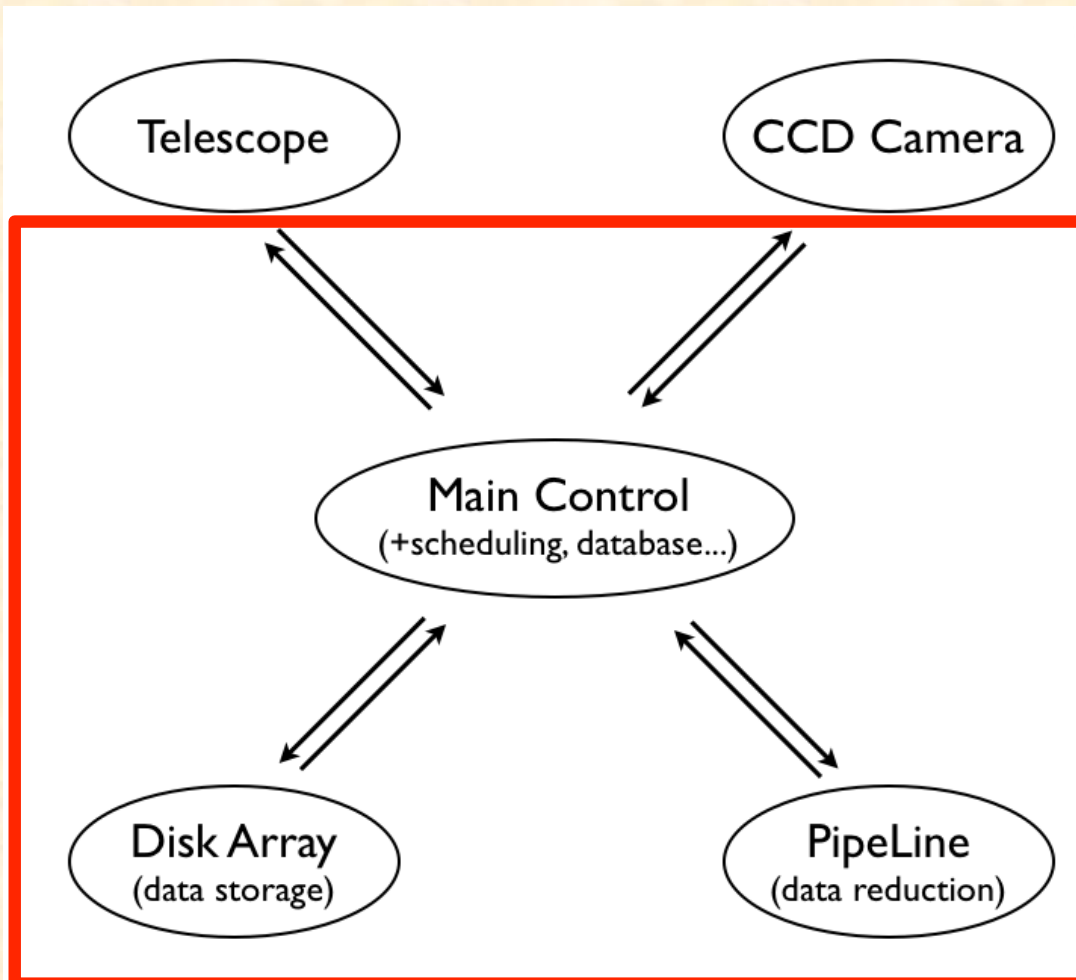

**AST3
Telescope**

AST 3 Survey

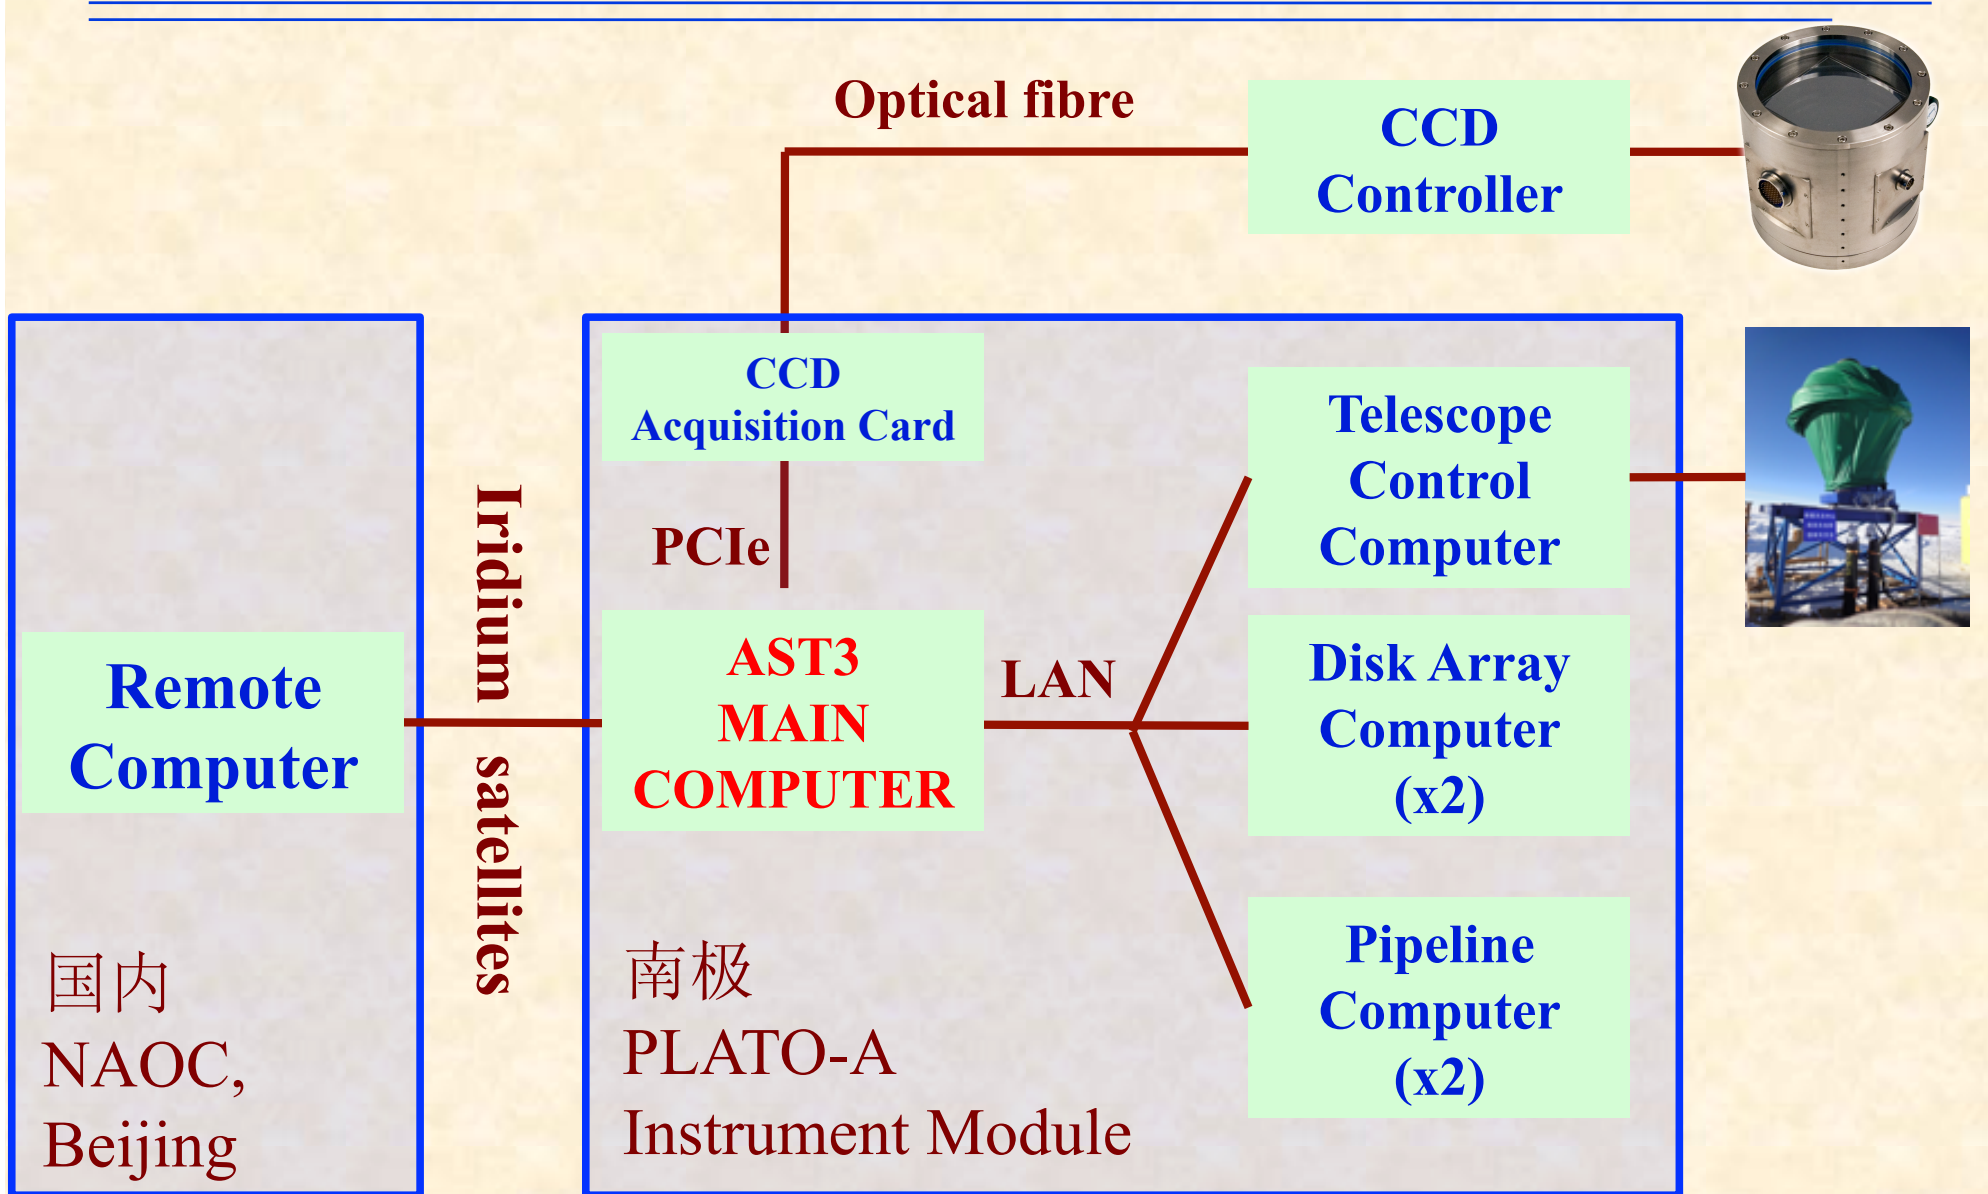

**CCD
Camera**

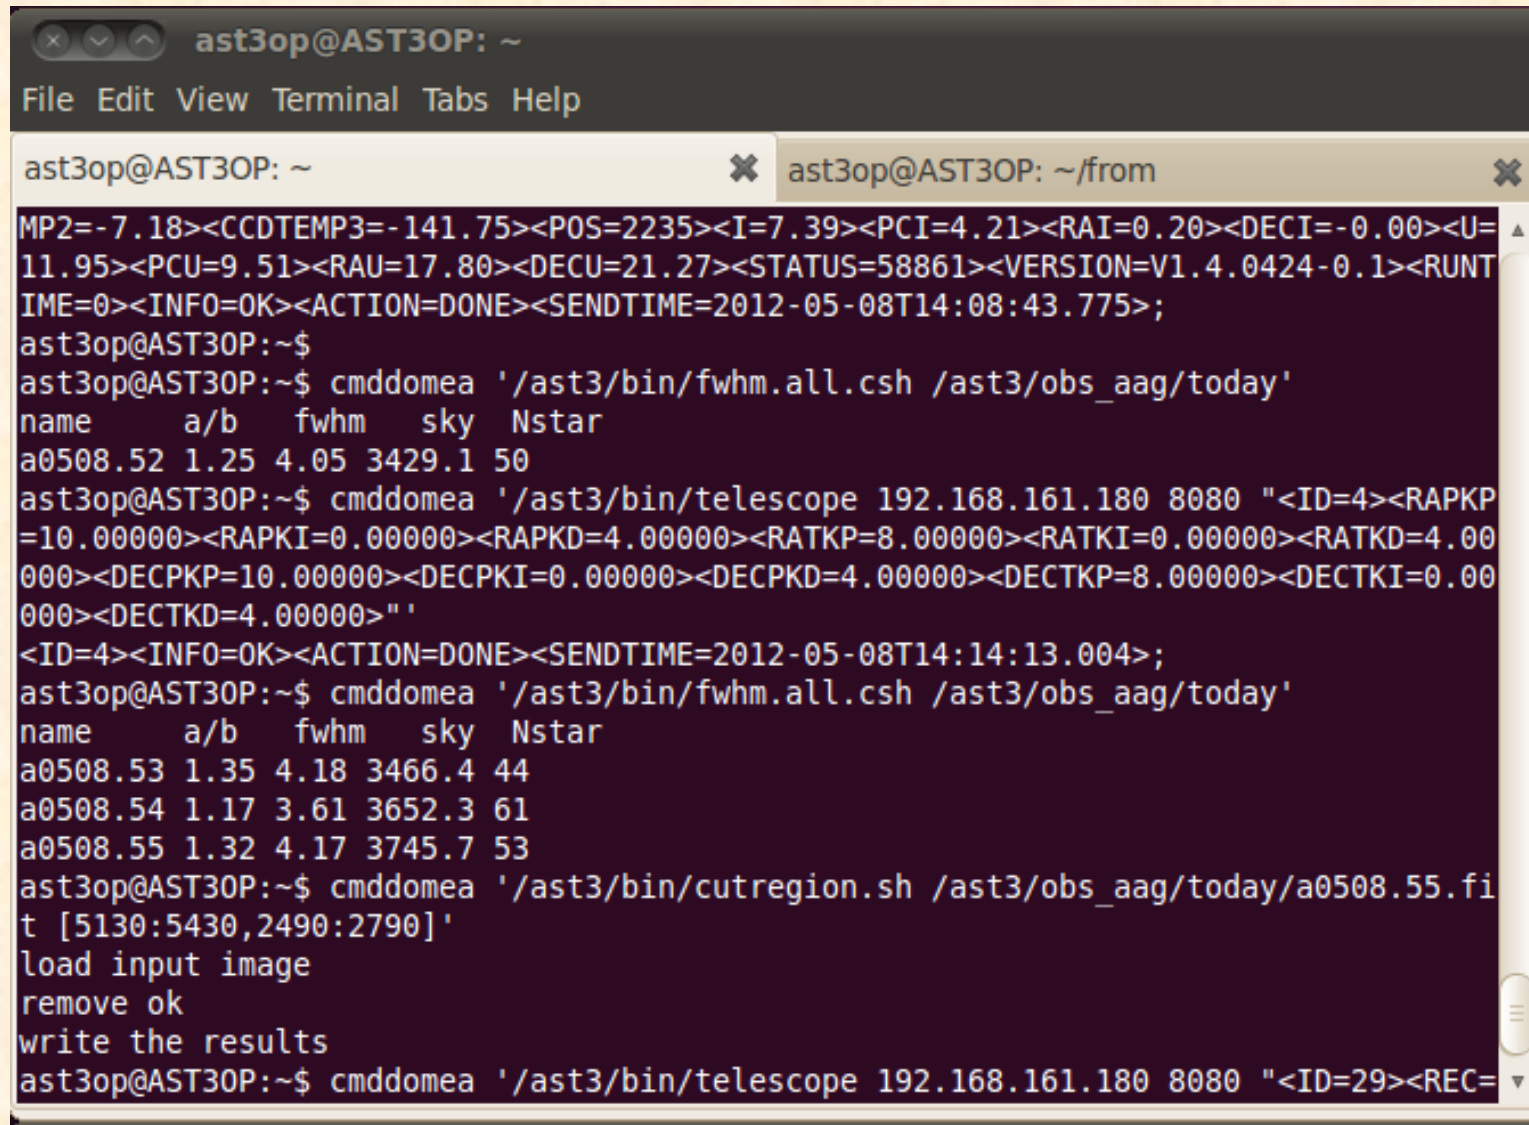

特殊要求

- 无人值守
- 低温低压
- 有限能源
- 低带宽
- 冗余
- 容灾

AST3 Operation

No GUI. Command-line instructions

AST3 Operation (remote control)

运行

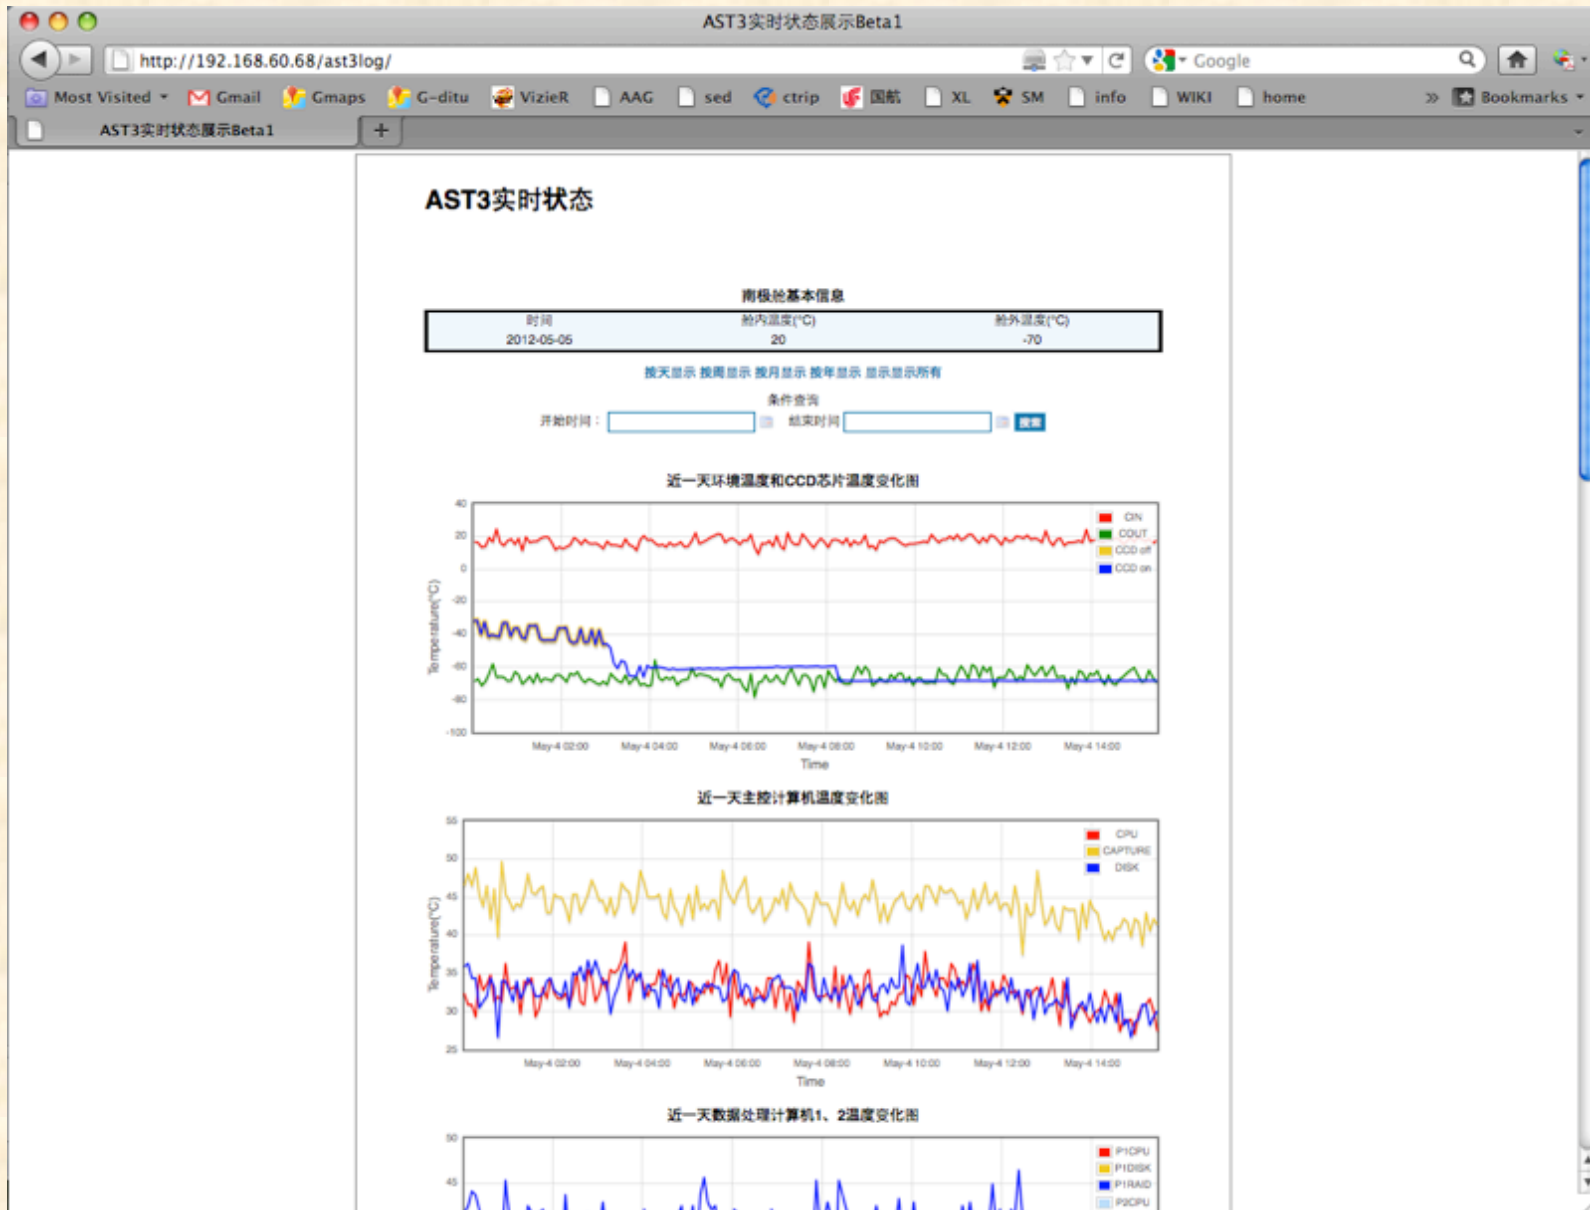

- 望远镜指令集 (pointing, tracking, ...)
- CCD 相机指令集 (exposure, ...)
- 运控计算机指令集 (power, temperature etc.)
- 数据（初步）处理和分析
e.g., 图像测光和统计

```
ast3op@AST30P:~$ cmddomea '/ast3/bin/fwhm.all.csh /ast3/obs_aag/today'  
name      a/b    fwhm   sky   Nstar  
a0508.53  1.35  4.18  3466.4  44  
a0508.54  1.17  3.61  3652.3  61  
a0508.55  1.32  4.17  3745.7  53
```

At a later stage, we were able to use scripts for all observations, making the survey semi-automatic.

AST3 Operation GUI for real-time status

三峡大学合作

AST3 data

- Each CCD image: 10k x 5K (>100 Mbytes)
- Data transfer rate via Iridium OpenPort: \$10/MB
- Stamp images: 300x300 (1/600 of a full frame)
(~80KB after compression)

Science Observations

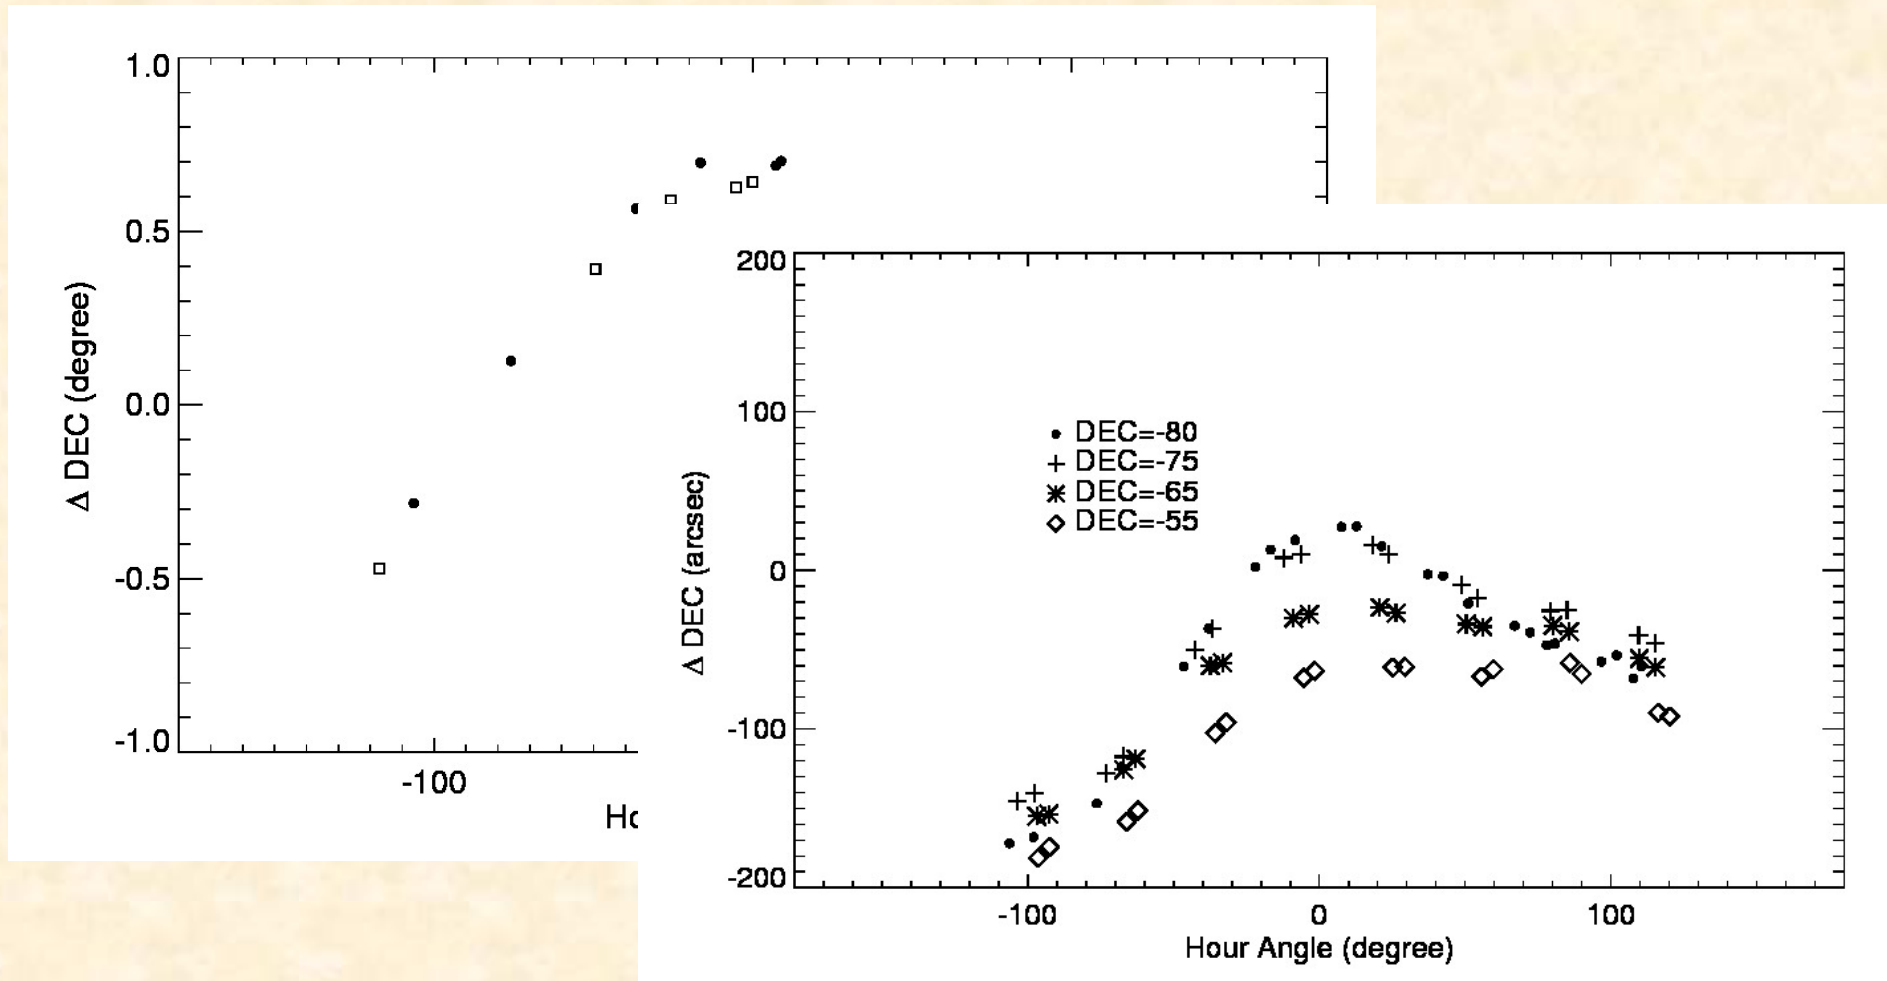

Obs in 2012: late March ~ early May
Targets: SNe, LMC, transit, QSO...

Engineering Runs

- Telescope Pointing Correction (TPoint)

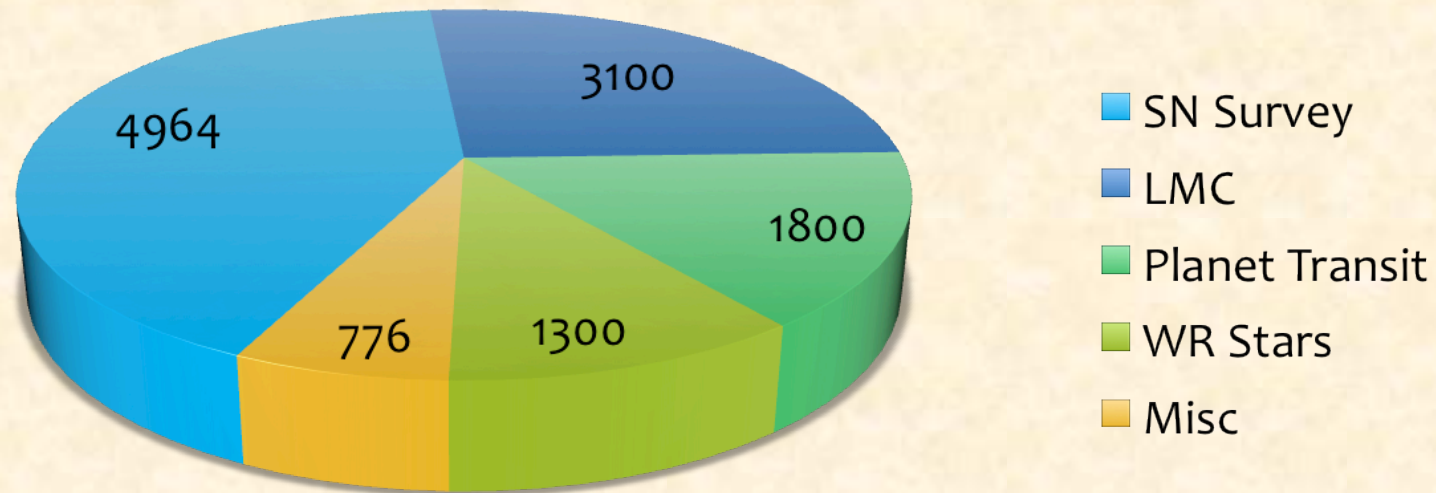

Summary of AST3 Operation

- Operation stopped in May due to a power-supply problem
- Collected 23,200 images, about 2.7TB data
- Sensitivity: $i=19$ (3 sigma) in 1 minute
- Image quality \sim FWHM $\sim 2''$.0 (1''/pix, resolution limited by optics)
- No obvious clouds except for three nights

Summary of AST3 Operation

Number of Images of Science Programs

We look forward to retrieving all the data next year.

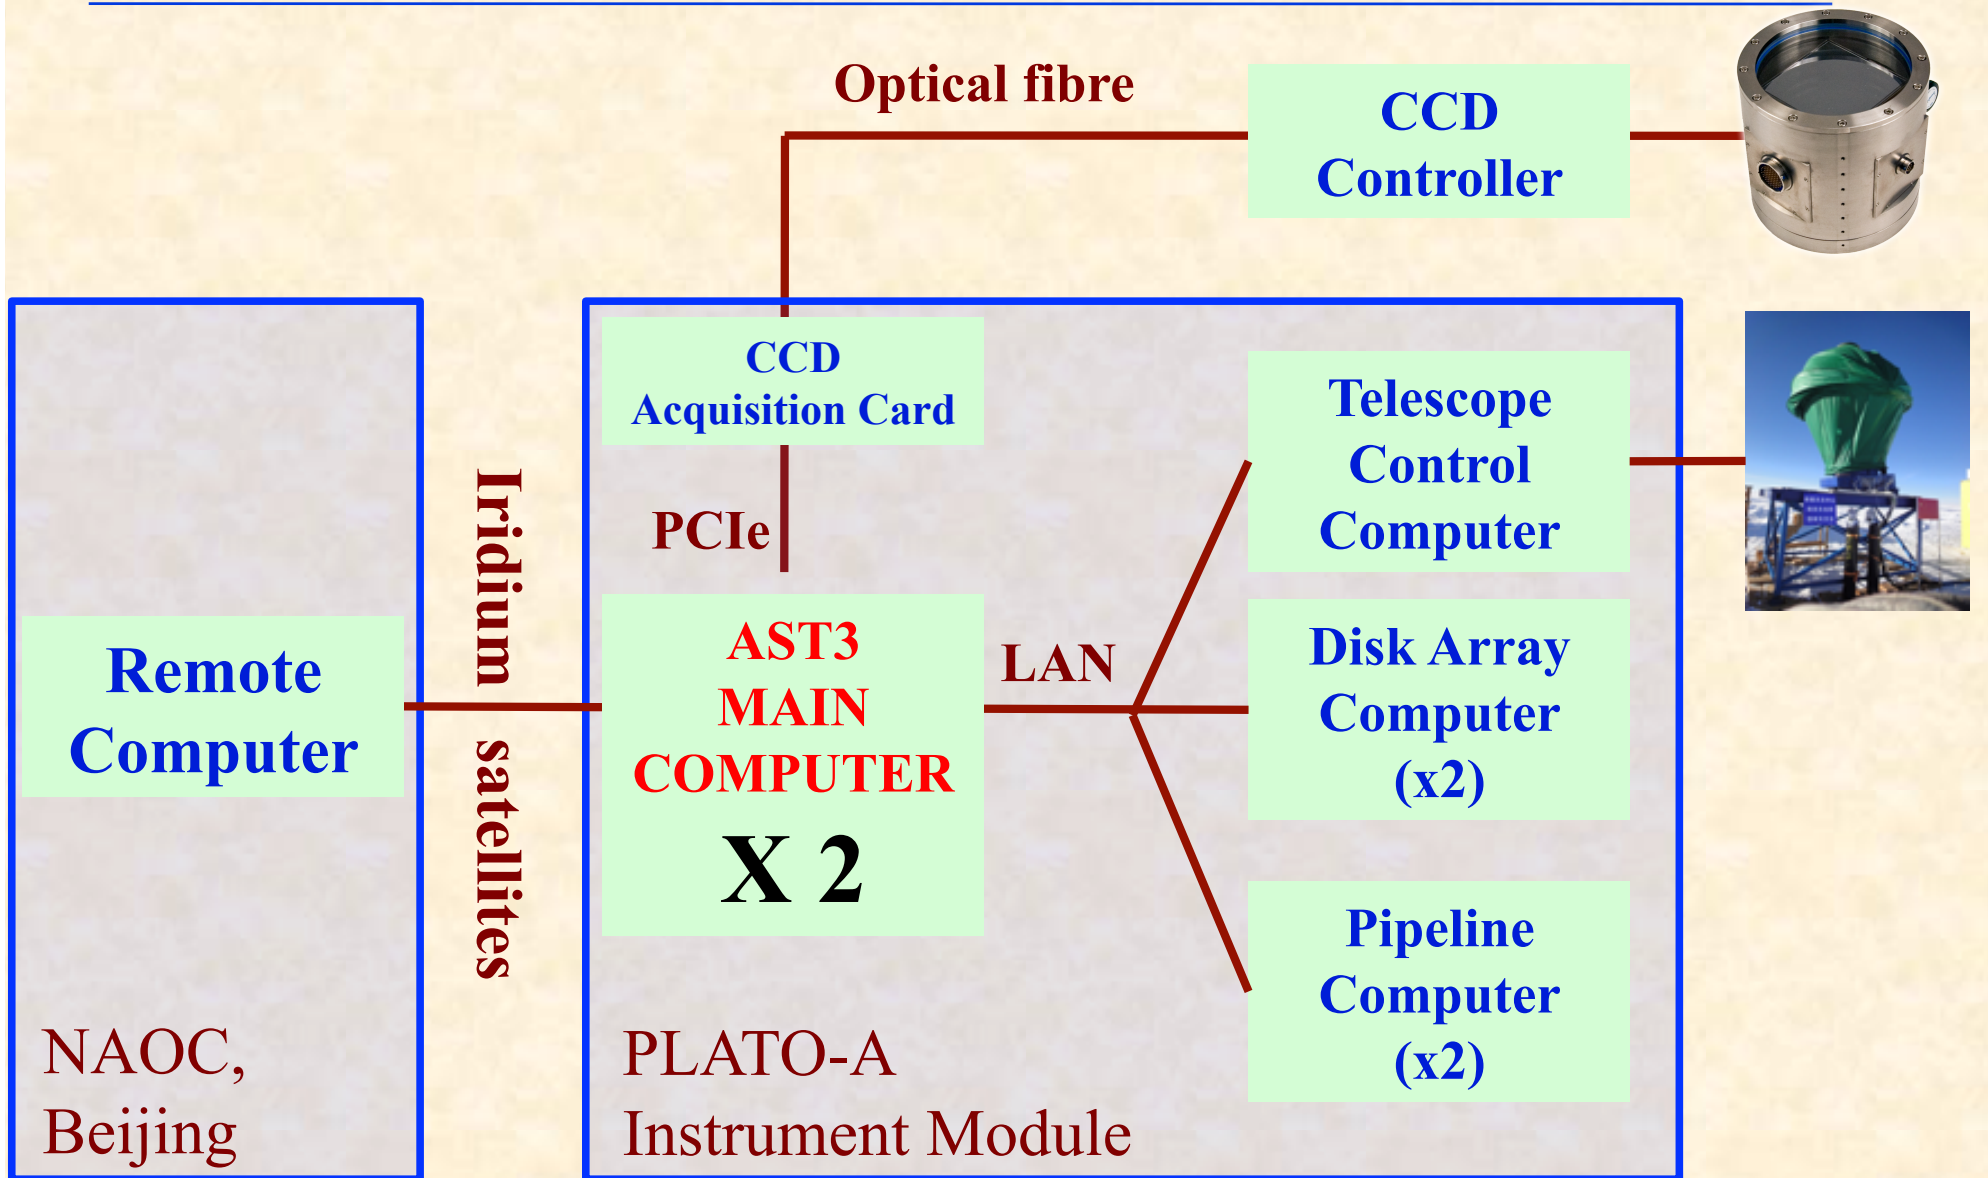

What we learned from AST3 Operation

- Low temperature and pressure tests works
- Low power computers work
- Redundancy is necessary
- Problem with the most reliable device (PDB) which never had problems before

- Never be too optimistic on anything
- Reduce single-point failures
 - Dual power supply
 - Dual network connection
 - ...
- Redundancy, redundancy, and redundancy

2012-2013

AST3 Operation

硬件冗余设计

Reduce single-point failure

- 数据存储的冗余
- 数据处理计算机的冗余
- 开关电源PDU的冗余
- 主控计算机的冗余（2台）
- 主控计算机供电的冗余
- CCD通讯的冗余(光纤法兰)
- 网络通讯的冗余(两个千兆网卡, 一个USB无线网卡)

AST3 Control, Operation and Data System—Hardware

Computers, Acquisition, and Storage Systems (Linux)

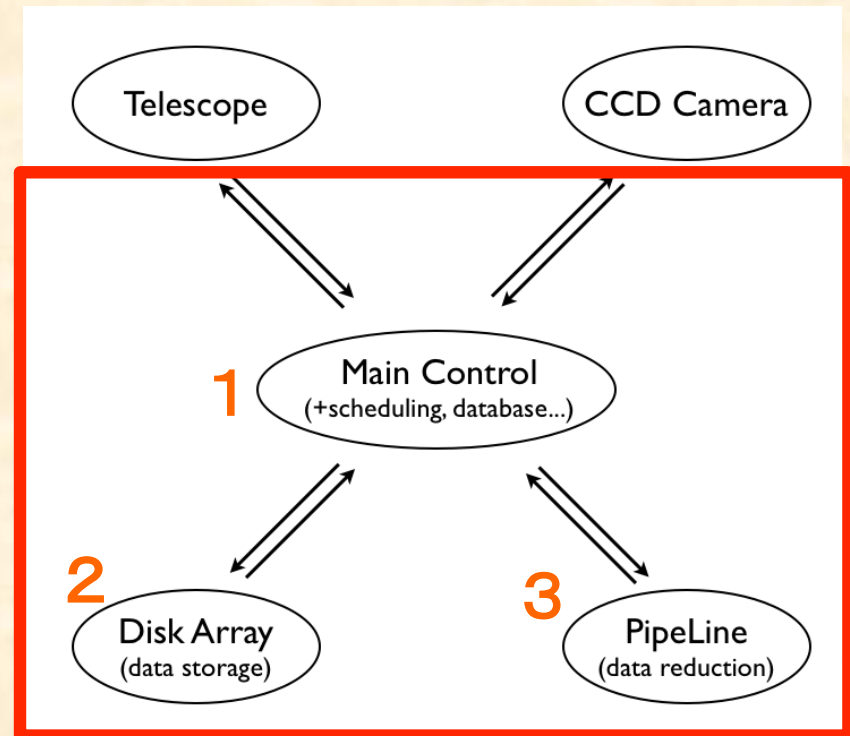

1. Main Control Computer x 2

- Survey Scheduling
- Data Acquisition
- Database
- Control other systems

2. Disk Arrays x 2

3. Pipeline Computer x 2

- Real-time Pipeline
(bandwidth too low to transfer images)

Customized Computer Systems

Designed based on past experience and actual conditions:

- Low air pressure is not a problem
- Controllable working temperature in PLATO-A (e.g., -10°C)
- Low cost

Computers

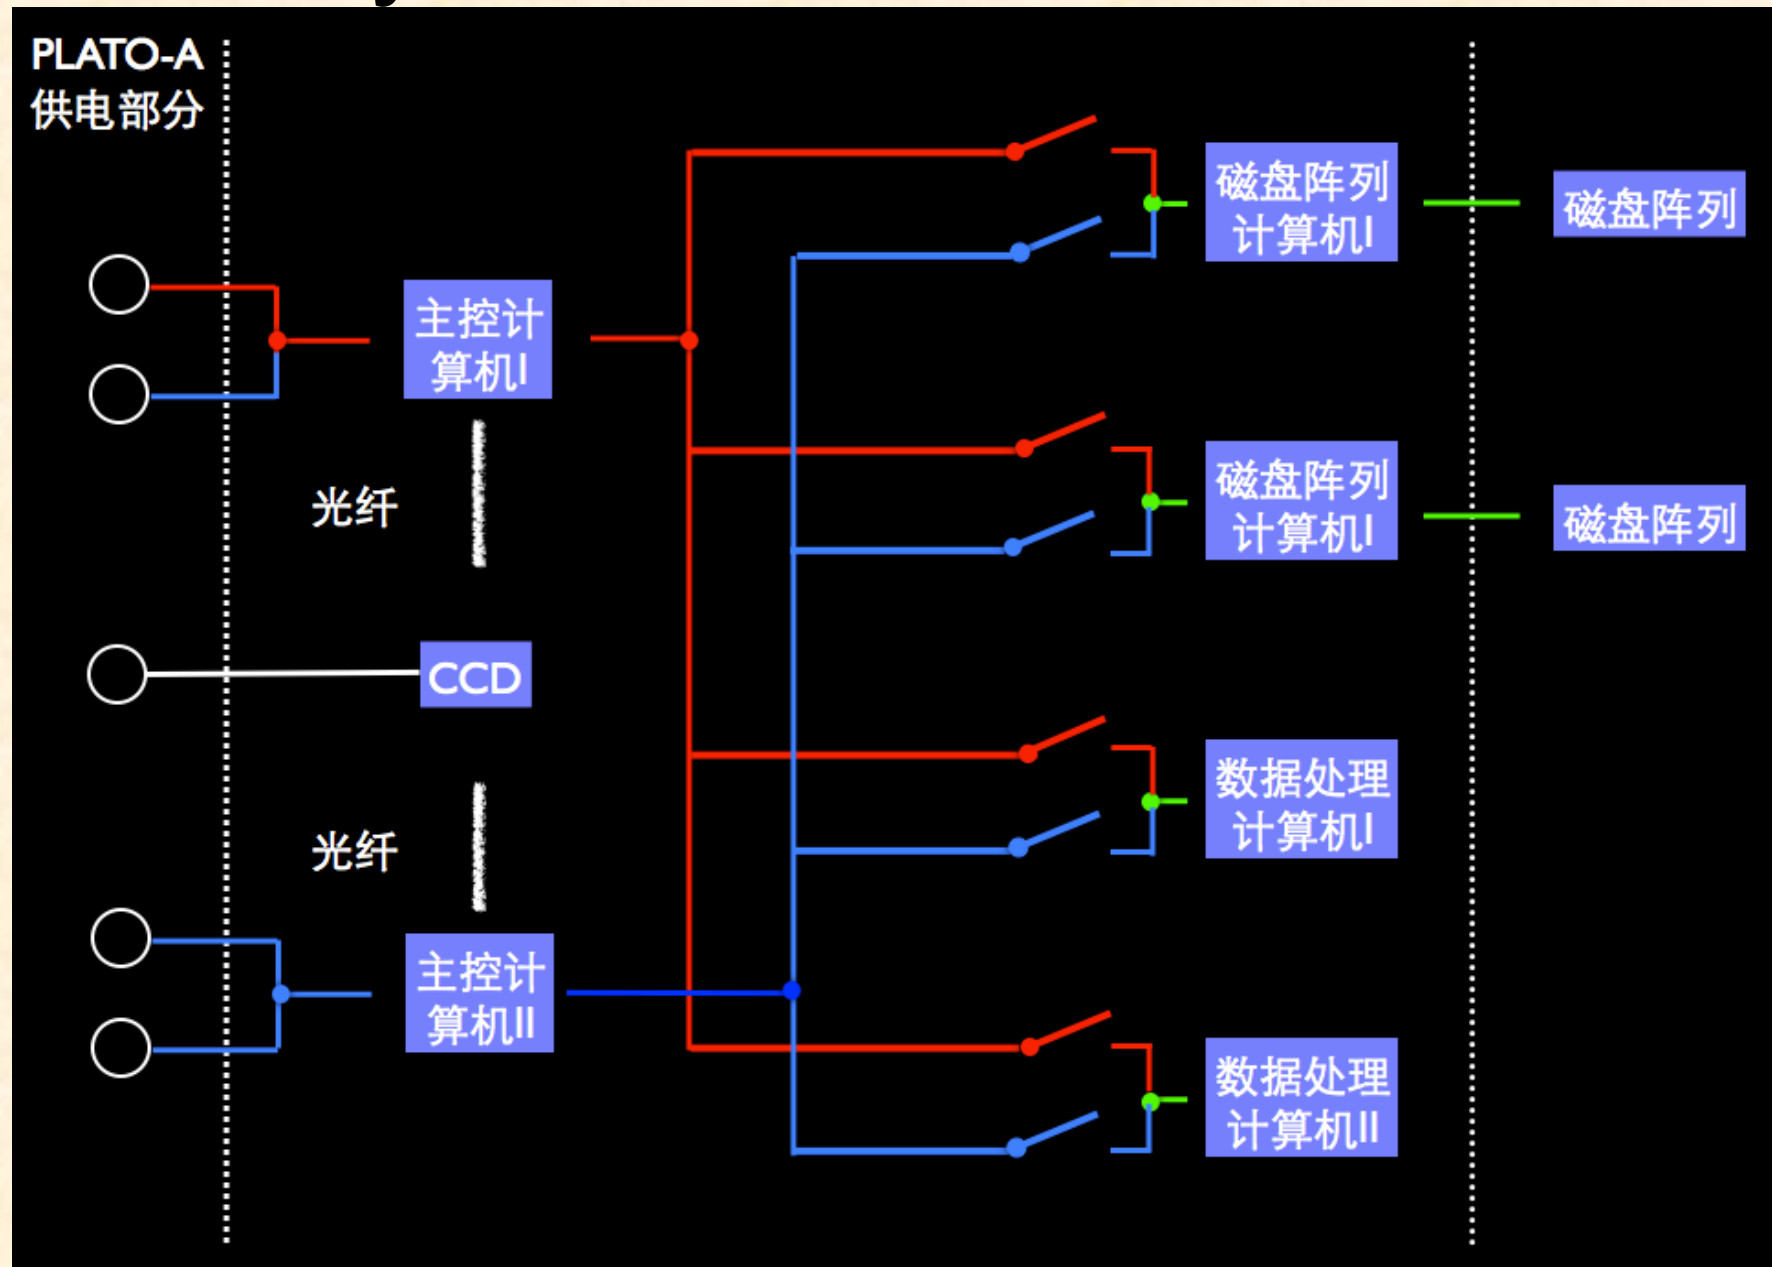

Laptop Configuration

- FPC7502, -20°C
- CFAST卡, -40°C
- i7-620M CPU, 8G内存
- PCIe x 1, PCIe x 16
- COM1-4
- 千兆网口 x 2
- 待机功耗~20W, 正常工作~30W, 满载~40W

各个性能满足AST 3 需求

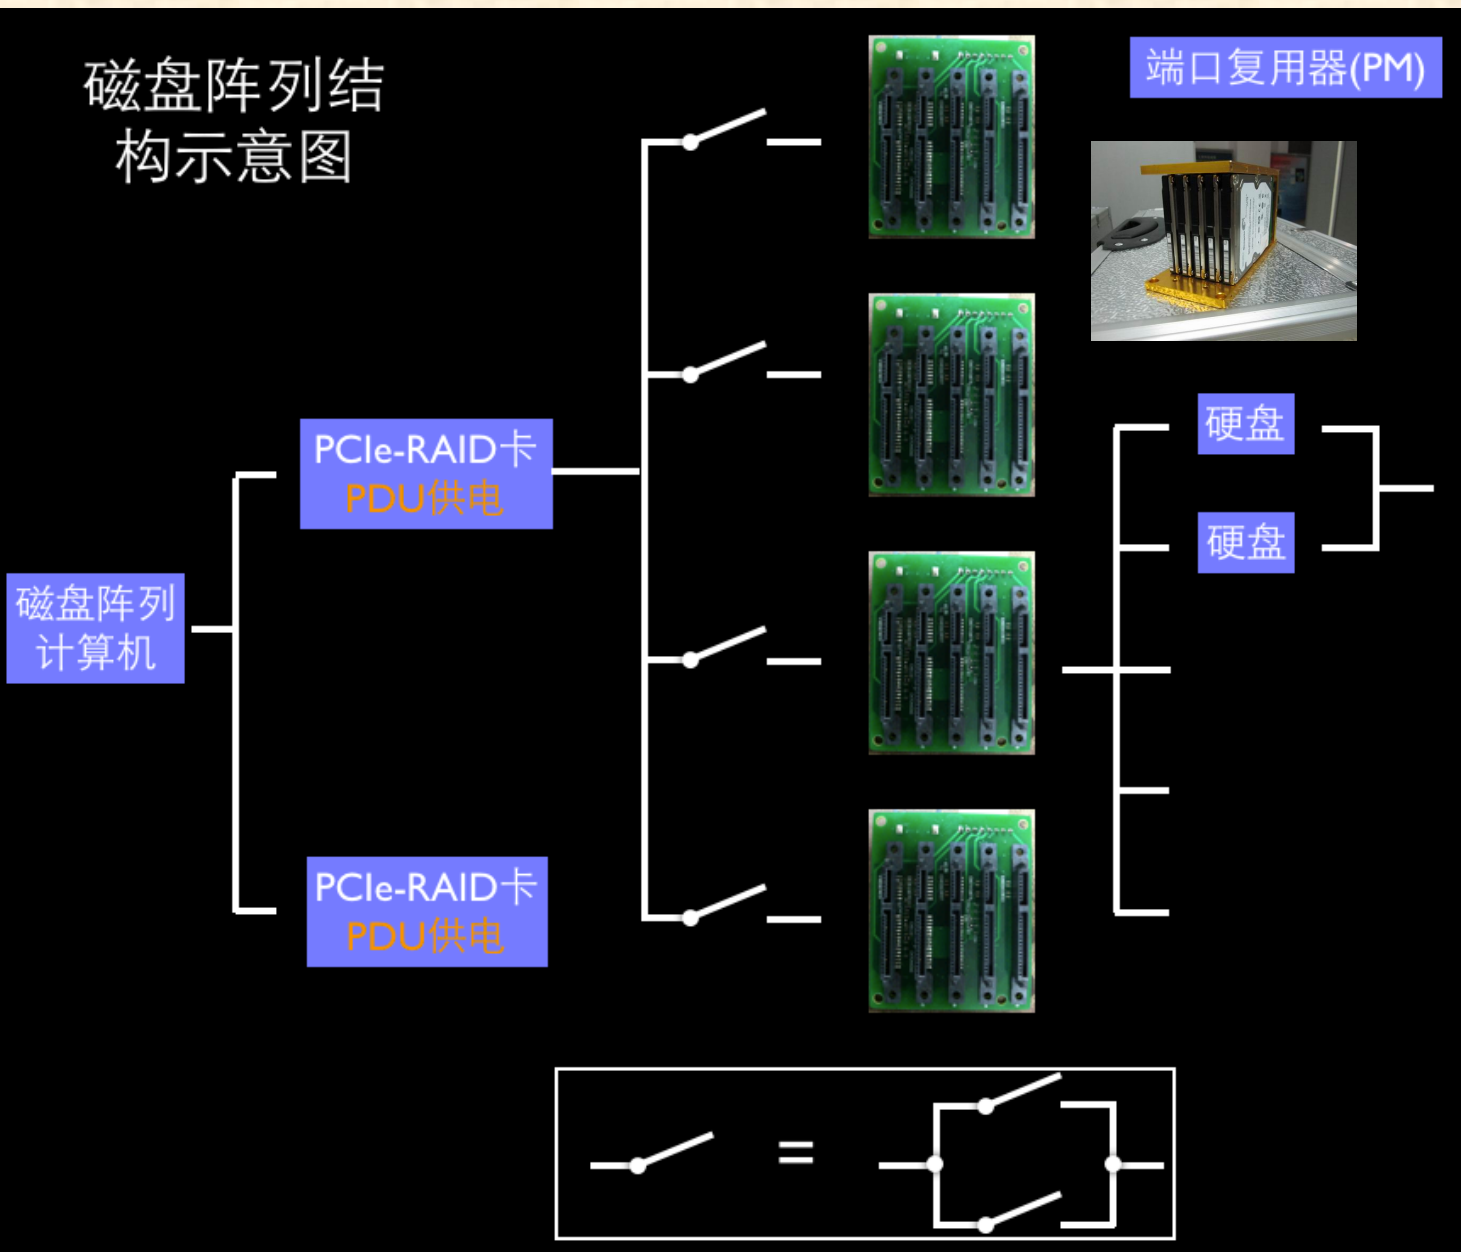

System Power Control

Customized Data Storage Systems

磁盘阵列结
构示意图

AST3存储阵列

- 易于扩充
- 温控 (-5°C到+5°C)
- 笔记本硬盘经过低温测试 (SSD太贵)

2011-2012年:

$(500G \times 5) \times 4 = 10T$

两套做冗余和备份

2012-2013年:

$(500G \times 5) \times 8 = 20T$

两套做冗余和备份

AST3数据处理计算机

Software

操作系统和运控软件

- UBUNTU 10.04桌面版(内核单独编译)
- AST3 SUITE:
 - 控制, 调度, 图像采集, 数据分发, 日志记录
 - 数据存储管理

AST3 Control and Data System—Software (Linux)

Original design principles:

- Fully automatic survey
- Limited remote control

Improvements

- threads => processes (daemon)
- Operation modes
 - Interactive (command-line)
 - Semi-automatic (script-based)
 - Fully automatic, if everything works properly
- Flexible individual instrument control commands (telescope, ccd, ast3serial)
